Tel Aviv University. Cum Laude. 1992

Research Interest

My research focuses on the role of accounting information in capital markets and on financial statement analysis. Its unifying theme is in exploring the properties of earnings quality and the factors that may affect the usefulness of the information contained in financial reports. Also, I am interested in integrating typical managerial and financial research topics to promote our understanding of the determinants of firms' cost behavior.

Fields of interest: Financial statement analysis, earnings quality, the role of accounting information in capital markets, earnings and cash management, textual analysis, cost behavior.

Publications

1. "The managerial perception of uncertainty and cost elasticity," Jason Chen, Itay Kama, and Reuven Lehavy. *Journal of Accounting and Economics*, Forthcoming.
2. "Camouflaged indicators of earnings management," Itay Kama and Nahum Melumad. *European Accounting Review* 29 (2020): 361-382.
