

Web of Science[®] Quick Reference Card

Search over 9,200 journals from over 45 different languages across the sciences, social sciences, and arts and humanities to find the high quality research most relevant to your area of interest. Link between relevant records using the cited references and exploit the subject connections between articles that are established by the expert researchers working in your field.

1 Search

Search by Topic, Author, Group Author, Source Title, Publication Year, and Address. Use the drop down menu for each search box to choose the area of your search. You can limit your search by original language of publication or document type.

- 2 Use the drop down menu to change the relationship between each search field to AND, OR, or NOT.
- 3 Add additional fields for a more complex search.
- 4 Change the time frame and data limits of your search.

Cited Reference Search

All cited references from each article are indexed and searchable. Search by Cited Author, Cited Work, and Cited Year. Remember: Secondary Cited Authors are automatically searched in Web of Science source records within your subscription.

The screenshot shows the ISI Web of Knowledge search interface. At the top, there's a navigation bar with links like 'Sign In', 'My EndNote Web', 'My Citation Alerts', 'My Journal List', 'My Saved Searches', 'Log Out', and 'Help'. Below this is a green header with 'ISI Web of KnowledgeSM' and 'Take the next step'. The main content area has a yellow banner with 'Web of Science[®]'. Below the banner, there's a search form with four numbered annotations:

- 1: Points to the first search field where 'stem cell' and lymphoma' is entered, with a dropdown menu set to 'Topic'. An example 'oil spill' AND 'North Sea' is shown below.
- 2: Points to the relationship dropdown menu set to 'AND'.
- 3: Points to the second search field where 'armitage J' is entered, with a dropdown menu set to 'Author'. An example 'O'Brian C* OR O'Brian C*' is shown below.
- 4: Points to the 'Add Another Field >>' button.

 Below the search fields, there's a 'Limit to:' section with a dropdown menu set to '(Change Limits)'. At the bottom, there's a 'THOMSON' logo and a footer with 'Please give us your feedback on using ISI Web of Knowledge.', 'Acceptable Use Policy', and 'Copyright © 2007 The Thomson Corporation'. On the right side, there's a sidebar with 'Discover Web of Science' and 'Customize Your Experience' sections.

SEARCH OPERATORS

Search using AND, OR, NOT, and SAME (same sentence) to create logical search statements. Nest search operators inside parentheses. Search exact or truncated phrases inside quotations marks.

TRUNCATION SYMBOLS

Use truncation to retrieve plurals and variant spellings.

* = zero to many characters
 ? = one character
 \$ = zero or one character

Full Record

1 Titles

The full title is indexed and searched in a Topic search. Foreign language titles are translated into English.

2 Authors

All authors are indexed. Search using last name and up to five initials. Click an author's name to find all the articles by that author name.

3 Source

Source titles are searchable. Search using the full title or use the Search Aid on the General Search page to select a title.

4 Abstract

All author abstracts are indexed and searched in a Topic search.

5 Author Keywords

All author keywords are indexed and searched in a Topic search.

6 KeyWords Plus

KeyWords Plus® are unique to Web of Science and consist of words and phrases harvested from the titles of the cited articles. KeyWords Plus are searched in a Topic search.

7 Addresses

All author addresses are indexed and searchable. Reprint authors are identified and their e-mail addresses are provided when available.

4 **Abstract:** Peripheral blood stem cell grafts from patients with lymphoma are often contaminated with neoplastic cells. Administration of a lymphoma-specific monoclonal antibody before collecting stem cells may be one way of reducing the contamination. Similarly, an antibody after transplantation at a time of minimal residual disease may increase the efficacy of the procedure. The objective of this study was to determine the safety of using rituximab as both an in vivo purging agent and a posttransplantation adjuvant. Eligible patients with lymphoma received 375 mg/m² rituximab intravenously (IV) on day 1, 2.5 g/m² cyclophosphamide IV on day 4, and 10 mg/kg per day filgrastim start-ing on day 5 and continuing until completion of leukapheresis. Patients subsequently received a standard preparative regimen and then received 375 mg/m² rituximab IV 7 days after platelet independence was achieved. Twenty-five patients (14 men, 11 women; median age, 51 years) were enrolled. Of the 25 patients, 23 received transplants after at least 2.0 x 10⁶ CD34(+) cells/kg were harvested. As determined with a sensitive polymerase chain reaction assay 6 of 7 stem cell products tested were free of tumor contamination. All patients engrafted promptly and the rituximab infusions were well tolerated. Transient neutropenia of uncertain etiology occurred in 6 patients a median of 99.5 days posttransplantation. An additional patient developed progressive pancytopenia. Rituximab used as an in vivo purging agent and adjuvant immunotherapy with peripheral blood stem cell transplantation for non-Hodgkin's lymphoma is a well-tolerated regimen. However, the ultimate determination of efficacy will require the results of ongoing studies.

Refine and Analyze

1 Refine your Results

Use Refine to mine a set of up to 100,000 results to find the top 100 Subject Categories, Source Titles, Document Types, Authors, Publication Years, Countries, Institutions, and Languages.

2 Sort Results

Sort up to 100,000 records by

- Latest Date (default)
- Times Cited
- Relevance
- Publication Year
- Source Title
- First Author

3 Analyze Results

Like Refine, with Analyze you can mine a set of up to 100,000 results. With Analyze you can output the results to Microsoft® Excel to create your own graphs.

4 Output Records or Save to Endnote Web

Quickly print, e-mail, or save selected records to Endnote Web. Click "more options" to save (as text) or export records to ResearchSoft Reference Software (*Endnote*, *Reference Manager*, and *ProCite*).

5 Create Citation Report

Click **Create Citation Report** for a graphical overview of the articles in a set of search results.

Personalize

1 Create Personal Profile

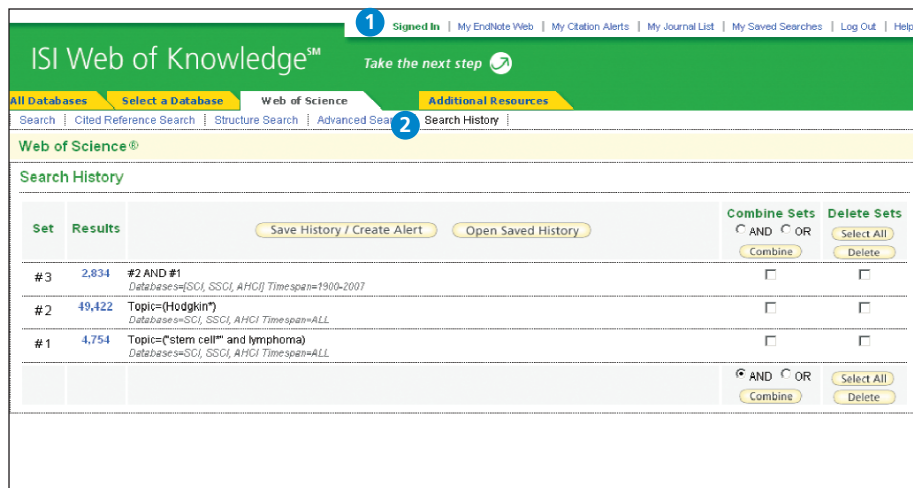

Any *Web of Science* user can create a personal ISI Web of Knowledge profile to take advantage of powerful personalization options. Creating a personal profile allows you to save:

- * Unlimited saved searches and search alerts
- * Unlimited citation alerts
- * An **Endnote Web** library of up to 10,000 references

2 Save Searches and Create Search Alerts

Click **Search History** to view your search sets and create set combinations. Save up to 20 sets as a Search History or an Alert. Alerts will be based on the last search statement in your history. Alerts will remain active for 24 weeks but can be renewed at any time. Click "My Saved Searches" and "My Citation Alerts" to manage and renew your alerts. If an alert expires, it will remain as a saved search strategy in your personal profile until you delete it. Searches can also be saved as RSS feeds; simply click the **XML** icon after clicking Save History.

- * Click "Renew" to set a new expiration date for any alert.
- * Click "Settings" to turn alerts on or off.
- * Click "Open" to run the saved search
- * Click XML to set an RSS Feed

EndNote Web

Save up to 10,000 records in your EndNote Web library. EndNote Web also allows you to add and format references in a document and search other online databases and library catalogs. References imported from ISI Web of Knowledge resources will remain marked with an EndNote Web icon and you can link back to the full record and view up-to-date citation information. EndNote Web also allows you to add and format citations to documents you are writing and perform searches of other online databases. Once you have created your EndNote Web library you can access your library at any time, either from your Web of Knowledge profile or by going to www.myendnoteweb.com and using your ISI Web of Knowledge user ID and password.

The screenshot displays the ISI Web of Knowledge EndNote Web interface. At the top, there is a green header with the text "ISI Web of Knowledge™". Below this, the "EndNote Web" logo is visible on the left, and a "Quick Search:" field with a "Go" button is on the right. A "Welcome," message is also present. The main content area is divided into two panels. The left panel, titled "View My References", shows a list of folders: "All My References (223)", "aids policy* (8)", "bird flu* (19)", "Fuel Cell* (26)", "oil spill (27)", "ptsd (15)", "sea level (27)", "waste water* (28)", "[Unfiled] (70)", and "Export List (0)". Below these are "Shared Folders" (Bird Flu, Cormac McCarthy, echinacea, Global Warming, Global Warming, stem cell, Sushi, Thin Films) and "Collect References" (New Reference, Online Search, Connection Files, Import, Import Filters). The right panel, titled "All My References", shows a table of references with columns for Author, Year, Folder, and Title. The table lists several references, including "Alberic, P." (1998, waste...), "Ansberry, Karen Rohrich" (2005, oil spill), "Arienzo, M." (2001, waste...), "Baillard, C." (2007, [Unfiled]), "Baillard, C." (2007, bird flu), "Baker, A." (2004, waste...), "Barham, P. J." (2006, oil spill), "Bastidas, D. M." (2006, Fuel Cell), "Bay, Christian" (1997, oil spill), and "Bayha, Keith" (1990, oil spill). At the bottom of the right panel, there is a pagination bar showing "1 2 3 4 5 6 7 8 9 10" and navigation arrows.
